

QUALITY POLICY

The aim of the policy of Plastchim-T AD is the Company to be more and more successful and to keep pace with the current trends in polymer processing and packaging industry. In order to achieve this, the functional and the manufacturing units and every employee, we all understand the requirements of our customers and are committed to deliver quality products that meet these requirements.

Our vision is to provide our customers with competitive products, which satisfy their specific needs and requirements. Our activity is focused on understanding the current and future needs of our customers, meeting their requirements and responding to their expectations.

We strive to fulfill successfully our mission by following the principles of sustainable development and to develop our company without endangering the well-being of the future generations.

We also constantly try to satisfy the needs of our personnel, maintaining such workplace environment, where everybody has the opportunity to grow and to show the best of its skills and abilities. We do not allow any forms of discrimination and adhere to the good practices in corporate social responsibility. Thus, we believe that we contribute to the prosperity and development of the society.

We use and update our quality policy, which is appropriate to the purpose and the context of the organization and supports its strategic focus.

We ensure that our quality policy provides a framework for establishing the quality objectives and includes commitments for satisfaction of the applicable requirements and continual improvement of the quality management system. We realize that the quality is a key factor for competing with other companies and that the quality management is a reliable means to enhance the customer trust in the high quality products. We believe that the continual improvement of the Quality Management System plays a key role for the economic growth and prosperity of Plastchim-T AD.
