

ENVIRONMENTAL POLICY

The environmental policy of Plastchim – T AD is focused on defining a system of management and organizational activities, aimed at continuous improvement of the products and services, offered by the Company, by efficient use of the necessary resources and compliance with the principles of sustainable development. The concept of sustainable development refers to a development policy, which aims to meeting the economical, social and ecological needs of the society in the short term, the medium term and first of all, in the long term. It is based on the principle that the development must meet the needs of the present without compromising the ability of the future generations to meet their own needs. In other words, this means creating conditions of a long-term economic development, protecting the environment.

The strategy, adopted by Plastchim-T AD, is by applying the fundamental principles of environment management to provide an optimal effectiveness of its business activities and at the same time, to maintain a high level of the quality of its products (services). We believe that by moving to and continuously improving the energy efficiency of the processes we will meet the defined and implied requirements of our customers, their needs and expectations, without harming the future generations.

We apply and maintain an environment policy, which is appropriate to the purposes and the context of the organization, including the nature, scale and environment impact of its activities, products and services. Our environment policy provides a framework for setting the environmental objectives, including commitment to the protection of the environment, including prevention of the pollution, sustainable use of resources, mitigation and adaptation to climate changes and conservation of biological diversity and ecosystems.

The top management expresses its commitment to fulfill its compliance obligations, including the obligations of continual improvement of the environmental management system to enhance the environmental performance.
