

Multilifting big bag

This type of packaging is a combination of one / two and four-point big bags. The range of applications is very wide, but they are mostly used for storage and transportation of seeds and other cereals.

The advantage of this type of packaging is the greater choice for lifting and transportation.

We produce multi-lifting packages with SF 6: 1 and with a load capacity of 500 and 1000 kg

Big bags are made of circular sleeve fabric, UV stabilized PP fabric and can be equipped with an inner PE liner, which can be fixed to the outer bag.

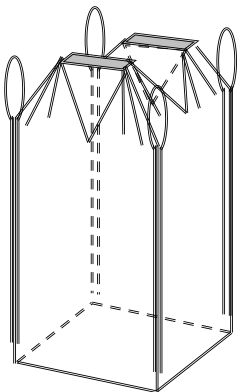

1. Depending on the way of filling, we produce the following types of packaging:

- * open at the top
- * with filling spout
- * with skirt

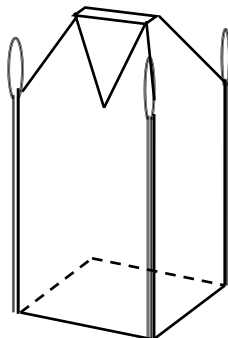

2. According to the type of bottom:

- * Closed bottom
- * Discharging spout

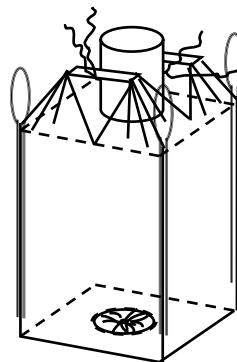

Multilifting 2+4 loops, open at the top, close bottom

Multilifting 1+4 loops, open at the top, close bottom

Multilifting 2+4 loops, filling spout and discharging spout

Multilifting 2+4, closed bottom and skirt
