

Flexible slings

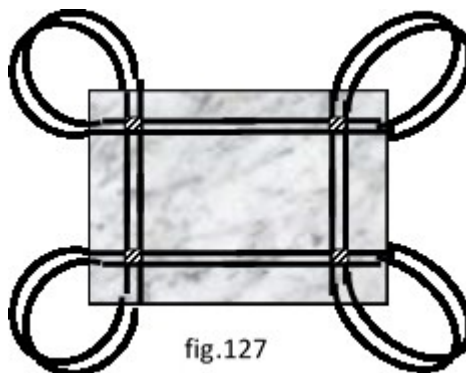

The slings are used for fast and rational arrangement, transportation, loading and unloading of bags. They are for single use only and cannot be reused. They are made of woven PP belts, with a load capacity of up to 1500 kg. At the customer's request they can be equipped with a bag. The slings are dimensioned depending on the size and arrangement of the bags. We mainly produce two types of slings:

* Sling type "clover" - this type of sling can be with a lay of PP fabric or a whole bag

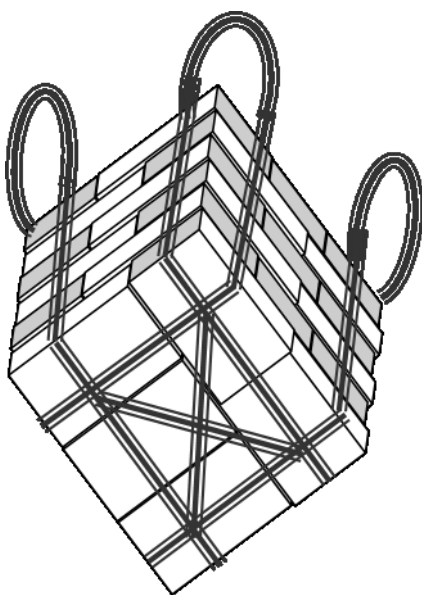

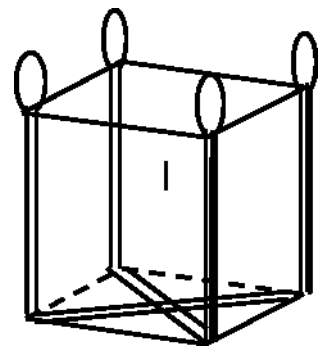

Sling "clover", without lay of PP fabric

Sling "clover", with lay of PP fabric

Sling, with inner PP bag

Endless slings
