

## Polypropylene Yarn

The yarn is Bindegarn type, with linear density of 700-4000tex (7000 - 36000den). It is twisted or not(rafia). If customer requires, the yarn can be with UV stabilization and/or coloured.

The yarn is coiled on cores with standard height from 15 to 25cm and diameter from 14 to 30cm. The spools are packed in heat-shrinkable film from 1 to 6 pieces in a stack or according to the customer request.
